IINTRODUCTION:

For over 25 years, Display Lighting Ltd has been at the forefront of designing and manufacturing specialist lighting. Since our founding in 1999 by lighting designer Paul Breedon, we have grown from a small, purpose-built solutions provider into a recognised leader in the exhibition and event industry, as well as in retail, leisure, museums and point-of-purchase displays.

Our reputation has been built on innovation, reliability and quality. From the early days of illuminating craft fairs and exhibitions, Display Lighting has continually evolved to meet the ever-changing needs of the industry. Today, we supply advanced LED lighting systems and bespoke solutions to businesses across the UK and worldwide, helping them create striking, energy-efficient displays that leave a lasting impression.

Bespoke lighting design remains at the heart of what we do. Our experienced design team works closely with exhibition organisers, retailers, designers and event professionals to deliver lighting systems that enhance branding, showcase products, and create memorable visitor experiences. Many of our clients report a direct uplift in engagement and sales thanks to our tailored lighting solutions.

Over the last 25 years, we have advised thousands of clients on projects of every scale — from small display cases to large-scale exhibition halls. Our expertise, offered free of charge, is not limited to our own UK workshop in Altrincham, Cheshire; we also source and specify the very best products available globally to ensure every project achieves the perfect result.

Whether you are organising an event, designing a retail interior, or developing a museum display, our team combines over a century of lighting experience with the latest LED technology and high-quality components to deliver creative, dependable solutions. Whatever the challenge, Display Lighting Ltd is ready to help you transform spaces with light.

EXPO LED Floodlights are designed to deliver powerful, professional lighting for exhibitions, trade shows, and events. Whether you need to highlight banners, backdrops, feature walls, or your entire stand, these floodlights provide crisp, even illumination that makes your display stand out.

Flexible Mounting Across All Stand Systems

One of the biggest advantages of the EXPO Floodlight range is its versatility. With a wide choice of mounting clips, the same floodlight can be used across multiple stand construction systems. This saves time, reduces costs, and allows for consistent lighting no matter the type of installation.

- **Compatible with all stand types: Works seamlessly with wooden stand builds, pop-up systems, and leading modular stand frameworks such as Aluvision, beMatrix, Octanorm, Syma, and Modul.**
- **Truss installation: Special clips are available to mount directly to truss structures, making them ideal for larger events or overhead lighting requirements.**
- **Future-proof investment: Because they can adapt to different stand systems, these floodlights can be reused show after show, maximising value.**

EXPO TRUSS Exhibition Floodlights

EXPO TRUSS floodlights are the most powerful lighting solution for exhibition stand construction, delivering an impressive light output of up to 18,000 lumens. Designed to illuminate entire stands from significant heights, they provide bright, even coverage that ensures your display stands out.

Floodlights are typically mounted on a truss system, which requires both strength and safety. To meet these demands, every EXPO TRUSS floodlight is supplied with a safety ring as standard, giving you complete peace of mind.

Installation is quick and straightforward thanks to the easy-fit truss clamp. Simply attach the clamp to the lamp, then secure it directly to the truss. For added flexibility, our specially designed banner pipe system allows floodlights to be mounted on a telescopic tube – perfect for highlighting banners or key display features.

DPLED GANTRY LIGHTING SYSTEM
Discreet, Powerful & Made to Measure

The DPLED Gantry Lighting System from Display Lighting Ltd is a sleek and unobtrusive solution for illuminating showcases and counters. Manufactured in the UK to your exact width and height, it blends seamlessly into bespoke display furniture while delivering bright, even illumination.

Available in a choice of finishes, including bright silver anodised as standard or custom powder-coated options, the DPLED can be fitted with clear, opal, or white diffusers to achieve the perfect lighting effect.

Powered by premium Luxeon LEDs, the system combines high efficiency with excellent reliability:

- **3000K warm white – 1770 lm/m**
- **4000K cool white – 1935 lm/m**
- **5700K daylight white – 2100 lm/m**

With smooth, uniform output, superior heat management, and optional dimming via V Pro Trailing Edge Dimmers, the DPLED Gantry system offers the perfect balance of elegance, performance, and durability for retail, museum, and luxury display environments.

TSP3 & TSP4 Desktop Spotlights
Professional LED Lighting for Exhibitions & Displays

Light up your displays with Display Lighting's TSP3 & TSP4 Desktop Spotlights — portable, powerful and built for professional impact. Perfect for exhibitions, fairs, retail, galleries, and museums, these spotlights deliver high-performance LED lighting in a sleek, compact design.

Why Choose TSP3 & TSP4?

- **Flexible Illumination – Independently adjustable MR16 LED spotlights let you highlight multiple products from one base.**
- **Lighting Options – Warm White (3000K), Cool White (4000K), or Daylight (6500K) to suit any display.**
- **Safe & Reliable – Low-heat LEDs protect sensitive items while ensuring long-lasting performance.**
- **Event-Ready Design – Weighted, felt-lined base for stability and surface protection.**
- **Customisable – Made in the UK with bespoke options available.**

Models: TSP3 (3-head) | TSP4 (4-head)
Finishes: Black, White, Polished Chrome
Trusted by exhibitors across the UK & Europe, the TSP3 & TSP4 offer professional-grade reliability and reusability — event after event.

SPECTRUM MR16 LV PRO SPOTLIGHT RANGE

Trusted by the Retail & Exhibition Industry for Over a Decade

The Spectrum MR16 LV Pro range is one of Display Lighting Ltd's most popular and versatile spotlight systems. Designed for both new installations and retrofit applications, this adaptable range has become a trusted choice for retailers, exhibition professionals, and cabinet makers who require high-quality, reliable, and cost-effective lighting.

Product Versatility

The Spectrum MR16 LV Pro range coordinates seamlessly with a variety of associated products, allowing for flexible integration across different display environments:

- **Spectrum MR16 LV Clamp Spot Plug & Play Sets – Quick-fit clamp mounting for exhibition stands and displays.**
- **Spectrum MR16 LV Clip Spot Plug & Play Sets – Secure clip-on solutions for lightweight displays and shelving.**
- **Spectrum Miniature MR16 Spots – Compact spotlighting for delicate displays, jewellery cases, and smaller cabinets.**
- **Tubelight Multi LV Pro – Multi-lamp configurations for wider area illumination.**
- **Tubelight TSL LV Pro – Slimline tubular design for discreet yet effective lighting.**
- **Tubelight TDL LV Pro – Decorative tubular design for a more architectural lighting finish.**

Custom-Built to Your Specification

Each spotlight can be manufactured to your exact requirements, ensuring seamless integration into your project:

- **Custom Sizes – Tailored to fit cabinets, showcases, and furniture.**
- **Installation Flexibility – Designed for integral incorporation during manufacture or simple retrofit applications.**
- **Lamp Options – Compatible with both LED and Halogen MR16 technology.**

SPECTRUM LED CLAMP KITS

The Spectrum LED Clamp Kits are a versatile and reliable lighting solution, designed specifically for exhibition stands, trade fairs, and display environments. Each unit features a single-point clamp mechanism that securely attaches to panels ranging from 5mm to 55mm thick, making them suitable for a wide range of display structures.

Equipped with independently adjustable spotlights, the Spectrum Clamp Kits allow you to rotate and direct the light precisely where it's needed — whether onto wall graphics, products, or promotional materials.

Key Features:

- **Adjustable Clamp Range: Fits panel thicknesses from 5mm – 55mm.**
- **High-Quality Finish: Manufactured from solid brass for durability, stability, and a decorative professional appearance.**
- **Flexible Arm Lengths: Available in custom sizes or a standard 300mm arm.**
- **Power Efficient: Powered via a single mains plug, reducing the number of sockets required — lowering costs and simplifying setup.**
- **Dual Mounting Options: Clamp horizontally to wall panels or vertically to table edges for discreet product or tabletop illumination.**

Lighting Performance:

- **Lamp Type: Supplied with 5W COB MR16 LED lamps.**
- **Colour Temperatures: Choose between**
  - **Warm White (2800K) for a softer, ambient effect.**
  - **Cool White (4000K) for a brighter, more neutral tone.**
- **Beam Angle: 36° spread — ideal for highlighting graphics, displays, and products.**
- **Lamp Maintenance: Easy to fit and replace, ensuring quick pack-down after exhibitions.**

Benefits:

- **Save on Exhibition Costs – Fewer power sockets required thanks to the single plug system.**
- **Professional Impact – Creates striking, targeted lighting to help you stand out.**
- **Compact & Portable – Lightweight and easy to dismantle, transport, and re-use.**
- **Discreet Illumination – Minimal footprint while maximising visual impact.**

Optional Upgrades:

- **Battery-Powered Models – Perfect for venues where mains power is limited or costly.**
- **Custom Arm Sizes – Tailored to your exact display requirements.**

Bespoke British Craftsmanship

Since 1999, Display Lighting Ltd has been proudly designing and manufacturing specialist lighting solutions from our base in the historic market town of Altrincham, Cheshire. With over 37 years of combined design expertise, our team has built a reputation for blending the very latest lighting technology with exceptional build quality and craftsmanship.

Every product we create is engineered with precision, manufactured to the highest standards, and finished with the level of detail demanded by the museum, exhibition, and retail industries. Whether it's a one-off bespoke project or a large-scale rollout, our commitment to British-made excellence remains at the heart of everything we do.

Teamwork & Service

At Display Lighting, we believe that true success comes from teamwork. Our dedicated staff take pride in every order, ensuring that every luminaire leaving our workshop meets the highest standards of performance and presentation.

Our relationship with customers doesn't end at delivery. We place just as much importance on after-sales support, offering guidance, maintenance, and technical advice whenever it's needed. This ongoing commitment is one of the reasons we've become a trusted name for specialist display lighting solutions across the UK and beyond.

Reputation & Trust

Over the years, we have had the privilege of working with many of the UK's most respected museums, heritage institutions, and high-profile retailers. From illuminating rare artefacts to showcasing luxury jewellery collections, our lighting systems have been designed to enhance displays while protecting delicate items.

We don't employ a traditional sales force — instead, the majority of our new business comes through recommendations and repeat customers, a reflection of the trust we've built over decades of reliable service and proven results.

When you choose Display Lighting, you're not just buying lighting — you're investing in craftsmanship, expertise, and a reputation built on excellence.
